About Harry

Love in Photography

I like recording the memories of life with my camera. Photography is my medium to think out of the box. I love the art of freezing time in photographs.

I wish that I could experience the people, the design, the architecture, the landscape, and all the colors in exchange. Through the picture to tell a rich heritage with stories. It is not only to keep the special moments but also participate in the photography competitions.

I'm so much convinced that it can make my photography to the new level.
